## The Emerald Ash Borer

Emerald Ash Borer (EAB) poses imminent public safety, budgetary and environmental risks to communities in Southeastern PA. EAB infestations in some communities will soon begin increasing at an exponential rate, and without intervention, the majority of ash trees will likely die over a short period of time. With effective planning the impact this pest will have on budgets, property value, safety and infrastructure can be moderated and the environmental benefits provided by urban ash trees conserved. At this workshop, you will learn more about planning and strategies to help mitigate EAB-related risks. This workshop is designed for municipal officials and employees; corporate and institutional landowners; landscaping and tree care companies; and anyone interested in planning for the imminent EAB infestation. ISA and Pesticide Applicators CEU credit will be available. This class will be held at Bucks County Cooperative Extension.

## EMERALD ASH BORER WORKSHOP

Register Now!

Thursday, May 9th, 2013

8:00 AM – 12:30 PM

### Location

Bucks County Cooperative Extension  
Neshaminy Manor Center,  
1282 Almshouse Road, Doylestown, PA 18901.

### Cost

The workshop fee is \$10

### To register

[www.pennhort.net/treetenders](http://www.pennhort.net/treetenders)

### Presentations

- Impact of EAB
- Environmental Impact
- Hazards of Dying and Dead Ash Trees
- Latest Research in EAB Treatments
- EAB Action Plans Examples
- Treatment tips and Pricing

## HANDS ON TREATMENT DEMONSTRATION
